Experience

Mobile Application Developer Intern, Zingvel Travels - Noida March 2024 – May 2024

- Built and deployed 4 scalable Node.js backend APIs, supporting 6 core mobile app functionalities for 25,000+ active users, employing RESTful principles for modular design.
- Executed seamless migration of the app's database from MySQL to SQLite, optimizing performance by 25% and ensuring <5 minutes of total downtime with 100% data integrity.
- Designed and integrated an AI-powered travel recommendation system, enhancing user engagement by 18%.

Skills

Languages: Python, Typescript, JavaScript, SQL

Frameworks/Libraries: React, React-Native, NodeJS, NextJS, Redux

Databases: PostgreSQL, SQLite, Prisma ORM

Tools & Platforms: Docker, Kubernetes, Git, XCode, Cursor, bolt.AI

APIs & Protocols: RESTful APIs, GraphQL

Education

Ajay Kumar Garg Engineering College, B.Tech in Information Technology

Nov 2021 - May 2025

- GPA: 7.82/10
- **Coursework:** Database Management System, Software Engineering, Data Analytics, Computer Networks, Java Programming, Cloud Fundamentals

Projects

Stocker

 [Github](#) | [Video](#)

- React Native stock tracker with real-time market data and ML-powered sentiment analysis, consuming RESTful APIs for data retrieval.
- Integrated news API and predictive analytics for investment insights.

Sales Doc

 [Github](#) | [Video](#)

- Developed a hybrid AI application for real-time sales conversation analysis and coaching, featuring a **Reinforcement Learning model with 96.7% prediction accuracy**.
- Delivers dynamic conversion probability, per-turn suggestions, and overall strategic advice to enhance sales efficiency.

F1 Community App

 [Github](#) | [Video](#)

- Motorsport community platform for chatting and sharing views with Supabase backend and ticket commerce.
- Interactive driver profiles with live statistics and discussion forums.

Achievements

- Global Hack Week: Open Source Week -3rd Spot
- **LeetCode:** Solved 150+ problems enhancing problem-solving and algorithmic skills.
